Vince Crawford, Delta District Manager
Utah Power and Light Co
372 West Main
Delta, Utah 84624

Dear Mr. Crawford:

I met with you just briefly on March 25th at the end of a meeting of the Milford water users. As you may recall, for the past two or three years, we have been using power use information on a number of the wells in the Milford area to help us calculate the amount of water that was pumped by each well. Now that UP&L's Milford office has been closed, we are concerned whether this information will still be available to us or not.

You said you could do some checking on this for us if I would write to you and indicate the type of information we need. We are interested in getting from UP&L any information or data for each pump that would help us to determine how long each pump was operated each month. With this information and our periodic flow measurements, we can calculate the quantity of water pumped. It would be most useful if we could get this information on a monthly basis so we could track water use through the summer.

If this type of information will be available from your Salt Lake office, could you let us know who we should contact to make the arrangements.

Even if your Salt Lake office is willing to help, I realize there might still be significant problems in getting this information. It was somewhat difficult to keep each well associated with the correct UP&L account even when the Milford office was open. I am concerned that since all this will be handled in Salt Lake now, keeping the accounts straight may be very difficult if not impossible. I would appreciate any suggestions you might have on how we could resolve this potential problem.

Thank you for your efforts. We appreciate anything you can do to help us. If you have any questions about our request or need further information, please contact me at 538-7380.

Sincerely,

Lee H. Sim, P.E.

Assistant State Engineer
for Adjudication and Distribution
